Operating Systems, security and Networks (207SE)
Lab 10: The Kernel Again

1 Your task

For up to 3/5 Change the cache_reader library from using the fopen, fread, fclose functions to the system call versions open, read, close

For up to 5/5 Remove (as far as possible) the effects of caching on the library. The slides have a big hint, but you **will** need the man pages and google for this.

2 Evidence

1. The code commented appropriately
2. Screenshot of execution of the code
